Regressive Progressive™ Jackpot Link System

What Is A Regressive Progressive™ Jackpot?

Regressive Progressive™ is Paltronics' name for a jackpot game that alternately increases and decreases after each jackpot prize is awarded.

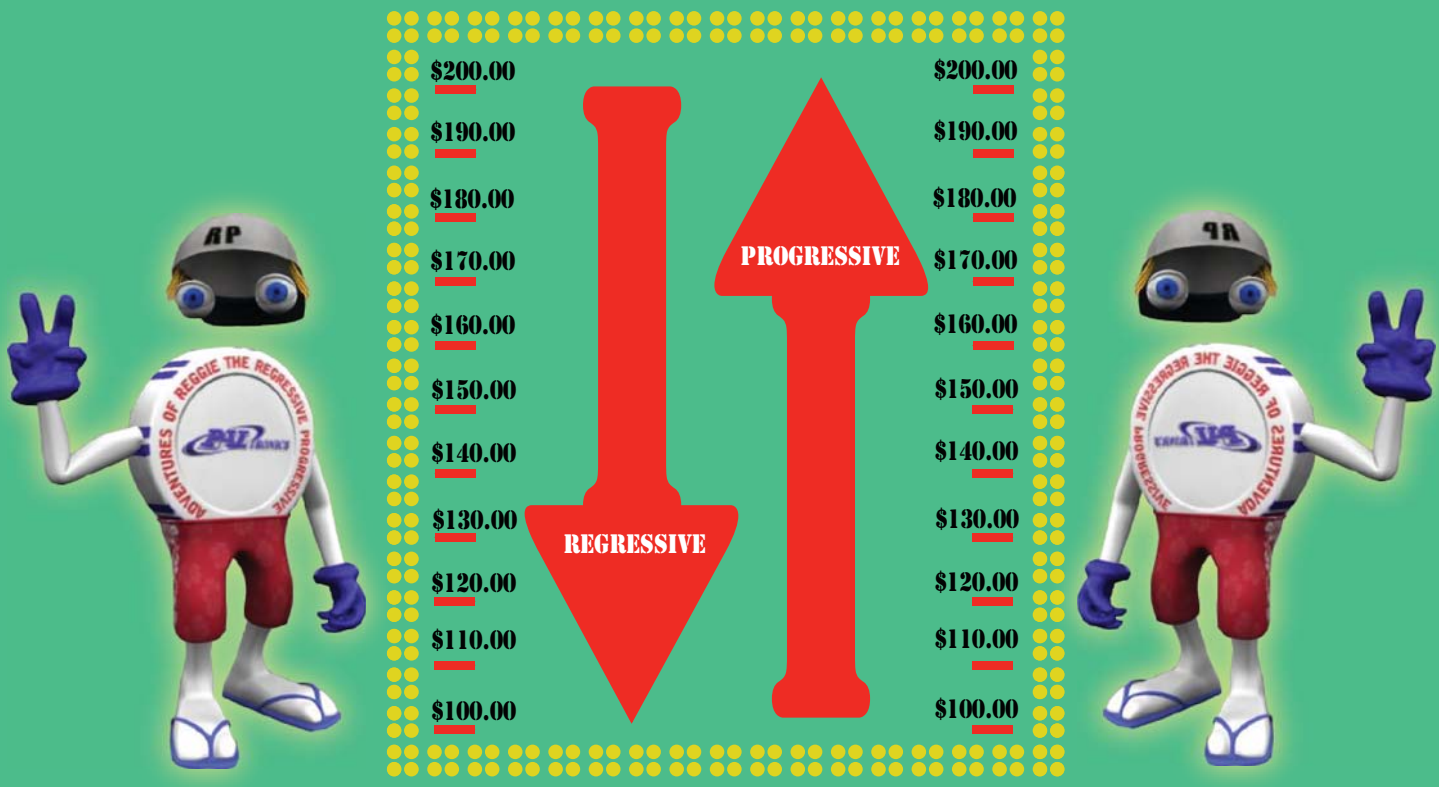

The jackpot begins incrementing from a start out amount, towards a finishing amount. For example, the jackpot "Starts" at \$100 and "Finishes" at \$200. The jackpot increments from \$100 to \$200, like a normal mystery style jackpot until awarded to the player. The displayed jackpot amount then "Starts" from the previous maximum amount, in this example \$200. The jackpot then decrements towards the previous minimum amount, in this example \$100 until awarded.

How Is A Regressive Progressive™ Jackpot Different?

The difference between a standard mystery jackpot and a regressive style of jackpot is that visually the amount available to be won is increasing or decreasing.

In a Standard mystery style random jackpot the displayed value appears to be increasing from a minimum amount, and the chance of the jackpot being awarded is also increasing.

With a Regressive mystery the jackpot amount appears to be decreasing from a maximum amount, whilst the chance of the jackpot being awarded is increasing.

What Are The Odds Of Winning?

The odds of winning a jackpot in Regressive mode are exactly the same as the odds of winning a jackpot in Progressive mode.

The average prize paid is exactly the same for progressive jackpots as it is for regressive jackpots.

Regressive Progressive™ Rules

- When the displayed jackpot value is incrementing, it is a standard mystery jackpot.
- When the standard mystery or “progressive” jackpot is won, the “regressive” jackpot becomes active.
- The regressive jackpot starts at the maximum amount for that level, and decrements toward the minimum amount.
- When the “Regressive” jackpot is won, the jackpot amount reverts to a standard “progressive” mystery.
- This alternate “Regressive Progressive™” movement of the jackpot value continues for the life of the jackpot.

What Parameters Are Available For The Regressive Progressive™?

- All existing approved Paltronics parameters can be used with this link system.

How Many Regressive Progressive™ Levels Am I Allowed?

- 2 Levels per Controller

e.g: \$100 - \$200] 1
\$200 - \$100

\$25 - \$50] 2
\$50 - \$25

Do I Require Specific Graphics Or Artwork?

Yes – Full Graphic and Artwork packages are available for this Industry First Link.
